Thor presents a towering spectacle with huge capacity and diverse features to keep users charging back for more. Two novice up-down climbing routes utilize Tritex material for traction and cooling effects. Once the formidable ascent is made, users choose from one of three jumping platforms located at 9' H (2,74 m), 12' H (3,66m) and 12.7' H (3,87m) respectively. Two integrated high-velocity chute slides and two angled drop slides provide (slightly) milder descent options. Once in the water, avid climbers can test their skills on one of two advanced climbing lines ascending from the water. Connects to any aquapark using Aquaglide's Interlock system. Ideally positioned in the center of a track run, Thor also makes an excellent stand-alone item.

* We recommend using Aquaglide mooring lines and weight recommendations as a starting point. It is the responsibility of the owner/operator to consider the needs of their specific site, to monitor aquapark items, and to make adjustments as necessary. Some circumstances may require additional weight or different types of mooring.
